

**FRP Institute** is a non profit professional society of the Indian composites community. It has members from all over India and the members list includes composites product manufacturers, raw material suppliers, composite specialists, consultants, designers, scientists, defence laboratories, educational institutions etc. The Institute works in close collaboration with the industries and institutions for upgrading the Composites Technology and to promote the growth of the Indian composites industry.

FRP Institute has the following main objectives in-order to promote growth of industry:

- i) Education & Training
- ii) Upgradation of Technology & Quality
- iii) Promotion of Growth & Exports

FRP Institute has successfully organized five International events - International Conference and Exhibition on Reinforced plastics (ICERP) and has got the recognition of international composites fraternity and the latest being ICERP 2011 which was held in March 2011. This event was biggest on composites in India and second biggest in Asia. The next event in the ICERP series will be ICERP 2013 and will be held on 4th to 6th April 2013 at Bombay Exhibition Center, Mumbai, India. Indian composites industry has an annual growth rate of about 14% and many composites products can be outsourced from India and FRP Institute can be a facilitator for promoting global interactions, import-export, outsourcing services and promoting joint ventures.
